

Issues on June 19 Version of Overall MFD Spec, and resolved points.

1. References will be added later
2. Table of Contents format will be made to agree with Resource document when content is stable
3. Unsure what to do about Datatype normative references (IDS Attributes discussion), but have added paragraph on datatypes.
Ira will generate new section on Datatypes.
4. Terminology: any more terms?
5. FaxModem Elements: do we agree? What about ItuStatistics? References?
To be discussed at face-to-face.
6. Table 30 and elsewhere,. DestinationUriSchemes is not listed as an element, no keyword reference. **DestinationUriSchemes Type is list of strings, not keyword..**
7. Table 33 and elsewhere. Keyword group listed as NMTOKEN, none or <Simple Type Union>. Where are the keywords identified?
See list at end of this document.
8. Table 39:
 - a. CompressionFactor not listed as element; **eliminated**
 - b. are JobPriority and JobSaveDisposition elements in the Job Ticket Document Processing set or JobProcessing set?.
 - c. Is Rotation an int or a keyword?
9. Fig 33. May want to replace with Spy Pic
10. SystemStatus Summary Status?
11. Table 47. RestartAllServices ??
12. What to add to System?

Keyword reference questions. Some elements of the Keyword or list of Keywords type do not appear to reference a specific set of keywords. What are the appropriate keyword sets?

JobCreationElementsSupported	list of keywords	NMTOKEN
UserDefinedValuesSupported	list of keywords	NMTOKEN

JobMandatoryElements	list of keywords	identifies Ticket elements the Scanner must honor. The Service rejects the request for job creation if any of the listed elements are unsupported or contain values that the Service does not support. All of the remaining supplied elements are best effort. NMTOKEN
----------------------	------------------	---

RepertoiresSupported	list of keywords	none
